

Problem :Mask pollution.

Solution :Biodegradable masks

- What is mask pollution?

In simple language, we can say that mask pollution is just like plastic pollution, the only difference is, the danger of mask pollution is very high.

- Biodegradable masks :

There are many polymers which can be used to make biodegradable masks but most of them are very expensive and hard to find. So my solution for that problem is to use jute .

Pros : •Easily available

- Very cheap
- Biodegradable
- Reusable
- Washable

Cons :

- None!
